

Mirasys Spotter Mobile

Mirasys Spotter Mobile brings true mobility to video surveillance. It allows remote access to video surveillance footage via various mobile devices – such as phones, PDAs and hand-held tablets. Authorized personnel can use Spotter Mobile when roaming, whether that be on-site, or from elsewhere. This supports situational awareness for first responders; provides security professionals with a more adaptable method for mobile monitoring; and much more.

- Access real-time and playback video from anywhere, anytime
- View and control PTZ cameras and I/O switches, e.g. locks and lights
- Receive alarms and share recorded images via email
- Currently available for iPhone, iPad, and iPodTouch devices
- True iPhone user experience – pinch zooming, orientation control, etc.
- Connects via 3G and WLAN networks

Spotter Mobile: Full-featured video surveillance meets the world-famous iPhone user experience.

Features

View Real-time and Playback Video

Easy access to multiple sites: New sites can be easily configured and directly accessed from Spotter Mobile. Each site can include up to 100 Mirasys recorders and 5,000 cameras.

Real-time video: View live video from any camera attached to the system. Zoom in to the streaming video easily, with the familiar user experience of the device E.g. in Apple iPhone using pinch zooming

Playback: Easy timeline searching to locate the desired video footage in the near history. Also date/time selector available for going fast to further history

Export: Still images can be sent via email as JPEG files

PTZ control: Manual control, preset positions, camera tours.

Input/output control: I/O controls, such as doors and lights, can be controlled via Spotter Mobile

Receive alarms: Alarms triggered by the solution, e.g. based on motion detection, are sent to Spotter Mobile users via email

Supported Platforms and Devices

Apple: iPhone, iPad and iPod Touch devices, with iOS 3.X and 4.X operating systems.

Connectivity

Wireless connectivity: supports the connectivity methods available in the specific device - WLAN and/ or 3G networks.

Gateway: Spotter Mobile connects to Mirasys NVR environment through the Gateway service. Gateway takes care of all communication between the Spotter Mobile client and Mirasys NVR environment, so no further components need to be opened to the Internet/ mobile connectivity.

User authentication: User authentication based on username/ password information. Authenticated users gain access only to profiles/ devices enabled for them.

Supported Cameras

All cameras supported by the Mirasys NVR – a wide range of analogue and IP cameras and video servers from the leading camera manufacturers including ACTi, Arecont Vision, Axis, Bosch, Elmo, Hikvision, IQEye, JVC, Messoa, Mobotix, Panasonic, Pelco, Pixord, Samsung, Sanyo, Seorim, Sony, UDP, Vido, and Vivotek cameras.
